

a. Metadata Include the Title, Author, and ISBN for this book.

Title: Django for Beginners: Build Websites with Python and Django

Author: William S. Vincent

ISBN: 1735467200

b. Coverage of Django Does the book cover Django 4? If not, how do you propose that I offset that deficiency when planning the course?

Yes, it covers Django 4.

c. Introductory Tutorial I would like to replace the Django Girls tutorial with one that is a bit more stable. Some books have their own introductory tutorial. Does this book have one? If not, what do you propose that I use for an introductory tutorial?

Yes, this book has one introductory tutorial.

d. Django Reference While the Pinkham book is not a reference book, it does cover many of the advanced Django features. Does the candidate textbook cover as many features as the Pinkham text? If not, can you suggest another book that I could pair with this candidate text as a Django reference?

Yes, I think this book covers many features.
